

CELEBRATING CALIBURN

Rutgers Discovery Informatics Institute (RDI²) invites you to the Rutgers University launch event for the new supercomputer, "Caliburn". Caliburn is the most powerful computing system in the region. It is currently ranked #2 among Big Ten universities and #8 among U.S. academic institutions. In addition, the system features an architecture designed by internationally recognized experts at RDI² that is unique in the world.

Please join the celebration and hear from government and Rutgers leaders, as well as Caliburn users, who will discuss the value this unique system can provide to research, education, industry and the state.

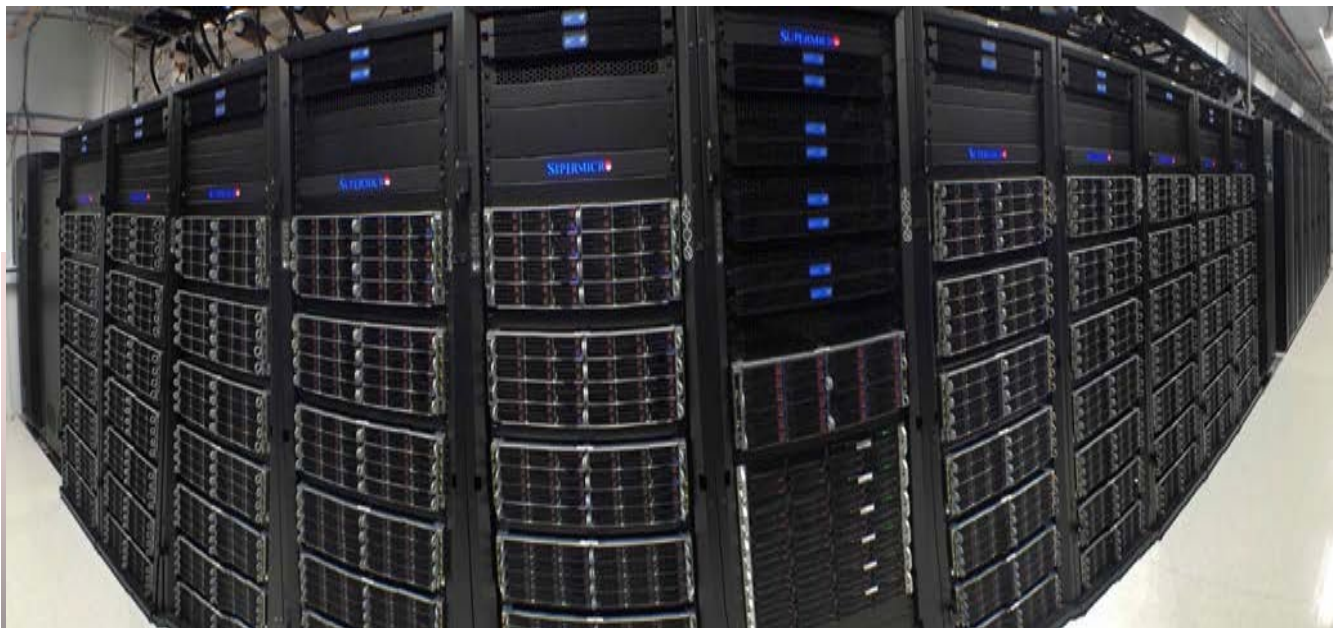

Thursday, December 15, 2016
