

Rutgers Discovery Informatics Institute

Open House:

Call for Posters

Contact: Javier Diaz-Montes, javidiaz@rdi2.rutgers.edu

Summary:

The Rutgers Discovery Informatics Institute (RDI²) uses advanced computation to address today's computer- and data-intensive grand challenges in science, engineering, and industry. The institute broadens access to state-of-the-art computing technology enabling large-scale data analytics, computational modeling, and simulations, all of which are playing an increasingly important role in research and innovation.

The **RDI² Open House** will be a half day event featuring an introduction to the Institute and remarks from RDI² senior leadership, as well as several speakers discussing their experiences with our new high performance computing equipment.

We are planning a poster session in conjunction with the open house and are currently accepting poster abstracts.

The goals of the poster session are to:

- Highlight the collaborative research RDI² personnel are conducting with other researchers in academia and industry
- Highlight the research Rutgers personnel are conducting on RDI² computational resources.

Timeline:

The RDI² Open House will be on February 23th, 2016. Poster topic proposals should be submitted by February 5th, 2016. Selected posters will be required to prepare a prototype in Microsoft PowerPoint or a reasonable substitute, and submit it for review by February 17th, 2016.

02/05/16 – Poster Topics Due

02/11/16 – Notification of Acceptance

02/17/16 – Completed Prototype in MS PowerPoint Due. **Note:** Prototypes should be constructed for posters that will be 3 feet wide by 4 feet high.

02/23/16 – Rutgers Discovery Informatics Institute Open House
